Start translating now → Translation memories Translation memories allow translators to boost their productivity and consistency by storing translated segments and reusing them for identical and similar source texts. Sign up for free → Machine Translation Smartcat supports a dozen of latest-generation neural MT engines from different providers. One tool to parse them all! Sign up for free → It's easy Gone are the days when you would have to deploy a server to keep, manage and centralize your translation assets. Nothing replaces the face-to-face interactions that you've been missing. This means that any segment you're working on will be inaccessible for other translators or editors until you confirm it. Translate a file now In-house teams + freelance translators We don't count seats — bring on board as many users as you need at no cost for you. - Emily Fogerson, Idaho Youth Ranch The most powerful, intuitive, high quality CAT tool Smartcat's CAT ("computer-assisted translation") editor combines a unique mix of features designed to help translators boost their productivity. Get an up-close look at high-margin products that will pop off your shelves and boost your profits - it's everything you've been waiting for. Adjust the settings to only pretranslate and/or confirm matches above a certain percentage or from certain TMs and the segments will be populated before the translation process begins. Get started → Context Provide your translators with screenshots or other relevant images by adding them to the segments — this can help you avoid many questions. Wherever you are, whatever OS you use, all you need is a browser to work in Smartcat. It is a fantastic resource, especially for our market. Invite your whole team over, in-house or freelance, so that they can work in a single environment. Smartcat automatically backs up your data to several dedicated servers on a regular basis to ensure that we can recover and restore it as quickly as possible if something bad happens. ASD is a one stop destination to source the wide variety of items that we carry within our retail price range. - Buyer, Non-profit thrift chain ASD is really a show like none other! It has huge selection of different products, the best prices, and a great place find trends and be a head of the curve and other businesses. Vendor DirectorySearch by vendor name, product type and key words plus see vendor discounts! Event InformationView important information including dates, times, and venue details. Start translating → It's web-based Start translating at home from your Mac and continue at the office on a PC. For general and administrative questions, translators and editors can communicate with the project manager via the main chat on the platform. Seamlessly connect Smartcat with other applications using our open API to build your custom workflow and manage translation projects in your own special way. If you worked in other CAT tools before, you won't have to retrain your fingers, as the combinations for common actions are the same in Smartcat. Everyone has access to the continuously updated translation assets and the editor can review and edit the translated segments as soon as they are confirmed, resulting in higher quality in much less time. Translators and editors can work on a document simultaneously seeing the full context and communicating in real time. You can set the MT output to show up as a suggestion or to automatically populate all segments for post-editing. Get started → Synced assets All project participants have access to constantly updated translation memories, glossaries and quality assurance checks.The whole team can benefit from reusing centralized, readily available and dynamically updated translation assets. PMs can configure translation memories and share them across different projects.
